17.7%

The Population Size has increased by 17.7% from 2011 to 2021 against the national average of 6% (ONS)

The most **affluent AB social grouping** are over-represented

Development & The Arc

Science and Technology

Bedford and Bedfordshire is a hub for education, science and technology.

The University of Bedfordshire has a vibrant and cosmopolitan student population numbering approximately 20,000.

<https://www.beds.ac.uk>

Cranfield University (10 miles south east) is a world renowned campus focused on science, technology, engineering, and management with specialisms including Aerospace, Defence & Security, Energy & Sustainability.

<https://www.cranfield.ac.uk>

Colworth Science Park has been a leading R&D location for more than 60 years and is unrivaled in the success of commercialising that research into global brands and innovative products.

<https://www.ukspa.org.uk/colworth-park>

Harper Trust – This trust runs four independent schools in the county, including Bedford School, Bedford Modern School, Bedford Girls School and Pilgrims.

<https://www.harpurtrust.org.uk>

Film & Television

Bedford is due to be home to some of the largest developments of Film and Television space in the UK.

Universal Studios have purchased a large parcel of land just to the south of Bedford and are in the early stages of planning a UK Universal Studios Destination and Theme Park.

<https://universelukproject.co.uk>

Home of Production, Bedford

Planning Permission has been granted for the 57 hectare Home of Production Film and Television scheme in Bedfordshire. Located just to the south of Bedford the scheme will deliver over 1.5 million sqft of indoor and outdoor studio space, accommodation, bars, cafes and other amenities.

All this extra development should not only drive tourism to the town but also, increase housing, schooling and a general increase in working population.

The Oxford to Cambridge Arc

Advances in technology, the availability of data and the financial pressure on drug discovery in particular, have resulted in the growth of the scientific arena and therefore in the commercial sector, which we have seen evidence of in the local markets, from Oxford to Cambridge and across the Arc between.

The location of the Arc in relation to the Golden Triangle and London, has witnessed the set up and growth of globally renowned science and technology organisations, encouraged by the variety of dynamic towns and cities within this area.

The potential for the Oxford – Cambridge Arc to become a science and tech superpower is evident in the prevalent companies already located in these locations, including AstraZeneca and F-Star and the continued funding being received, in addition to the pioneering history the area has. For Cambridge specifically, the science and technology sector has been a focus for over 50 years, since the creation of Cambridge Science Park by Trinity College.

Further, clustering of life science companies located within the Arc and their preference for collaborators to be located within a couple of hours of their site, suggesting that the continued growth and success of the Arc is most likely.

The property comprises two separate buildings situated on an 8.83 acre site. Woodlands House is approximately 102,224 sq ft (9,497 sq m) over 4 floors. The Annex is a separate 9,890 sq ft (919 sq m) over ground floor only.
